

Environmental Monitoring Equipment Rental

Our rental equipment service allows you to get on with running your own business while we take care of the certification, maintenance and calibration of the monitoring gear with practical and fully trained personnel.

AUTOMATED SAMPLERS

Automated samplers for flow-proportional or time-proportional water or wastewater sampling. Samplers can be programmed to your needs, or ask us to pre-programme them. All samplers can be set up for mains powered sites, or we can accommodate remote and non-powered sites.

- ISCO GLS for composite samples
- ISCO 3700 for 24-hour discrete samples

FLOW MEASUREMENT

Talk to us about your flow measurement needs. We have a range of devices for many different situations as well as extensive in-house expertise.

- Area velocity flow meters
- Transit-time flow meters
- A range of weir plates and inserts

ISCO AUTOMATED SAMPLERS

- Fully maintained and serviced
- 24 hour or composite sampling
- GLS - Optional glass or poly vessel
- 3700 - Optional extra tray and bottles
- Sampler tube length to suit you
- Short or long term rental
- Samplers and configurations available for complex surveys
- User manual or simplified instruction sheet provided
- Can be freighted within New Zealand

ANALYTICAL INSTRUMENTS

BPO rents water quality measurement instruments including hand-held field instruments to fully deployable multi-parameter datasondes. BPO staff can advise you on the best instrument for the job, to make sure you get robust reliable data for decision-making.

All instruments are well maintained and calibrated.

- Field instruments
- pH, turbidity, DO, conductivity
- Multi-parameter datasondes
- Temperature loggers
- Temperature and pH Loggers
- 4-20mA loggers
- Current loggers

HEALTH & SAFETY EQUIPMENT

Trained Occupational Health & Safety Practitioners, Permit Receivers and Safety Observers are inducted on many large industrial sites.

- Manhoist
- Air displacement blower
- Personal gas detectors
- All equipment serviced and maintained to high standard.

BLOCKING DRAINS FOR SAFETY

While site work is being done, drains may need to be blocked. BPO has a wide range of sizes of airbags and plugs with options for flow-through and complete block.
