

# Wastewater Monitoring Stations

## PLUG AND PLAY

Our wastewater monitoring stations have been supplied and commissioned on industrial sites throughout New Zealand and Australia. Data can be reprocessed to suit your reporting requirements.

You choose:

- Options for flow measurement
- Options for telemetry
- Options for analytical parameters
- Options for sampling

### Telemetry:

- 3G data connection
- Data reprocessing for mass load
- Web-based cloud data solutions

## PERMANENT INSTALLATIONS

The BPO wastewater monitoring station provides a comprehensive platform for all your wastewater monitoring needs in a permanent installation, tailored to your needs.

Capabilities:

- Monitoring of two waste streams per installation
- Level measurement for flume flow calculation
- Analytical parameters that can be added include pH, turbidity, ORP, refractometry, conductivity, temperature

## FLOW MEASUREMENT

- Stainless flumes for high accuracy
- Range of weir plates and inserts
- Calibration service

## TEMPORARY INSTALLATIONS

- Automated samplers — 24-hour or bulk composite
- Flow or time-proportional sampling
- Flow measurement tailored to the site
- Power options solar, mains or battery
- Telemetry

## PORTABLE STATIONS

- Suitable for remote sites, powered or nonpowered
- 24-hour sampling, time or flow-proportional
- Hire the gear or use BPO Ltd technicians to design the survey and collect the data.
- A wide range of temporary flow measurement installation sizes are available.
